

Adding Varicella Titer to MediEase 3.3

If MediEase doesn't include a Varicella Titer as an available event, please follow these instructions:

1. If MediEase is open, close the program.
2. Open the IMM program and choose the **Events** tab.
3. Click the **Add** button. This will open the dialog box for adding a new Dose/Event.
4. In the **Code** field type something meaningful (e.g. Vartitr). For the **Name** field type Varicella Titer. From the **Event Type** drop down box choose Titer.
5. Click the **OK** button.
6. Click on the **Immunizations** tab and then double click the Varicella Immunization. This will bring up the Immunization dialog box.
7. Click the **Select** button. This will bring up a new dialog box. From the list box on the left, find the newly created Varicella Titer event and move it to the list box on the right.
8. Click the **OK** button.
9. At this point you should be back at the Immunization dialog box. Double click on the word **General** in the Compliance Rules list box. This will bring up the General Compliance Rules for the Varicella dialog box.
10. Click the **Or** button. This will add an **or** statement to the list box.
11. Click the **Event** button. This will bring up the Dose/Event Rule dialog box. From the drop down list choose Varicella Titer.
12. Click the **OK** buttons until you are back to the main screen of the IMM.
13. The event is now associated with the Varicella Immunization. **Close the IMM and Open MediEase. A Varicella Titer is now an available event for Varicella.**
